DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 5-9, and 14 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach an analog to digital converter that comprises a plurality of comparators that compare an input electrical signal with a pre-selected reference voltage; the reference voltage comprises a current source coupled between an emitter of an output transistor and ground; a reference resistor coupled to a base of the output transistor to set an operation current of the output transistor, a control transistor coupled to the reference resistor in parallel with the output transistor to allow current flow through the reference resistor, a current mirror coupled in parallel with the reference resistor and control transistor to control the current flowing through the reference resistor; the reference voltage further comprises a trans-admittance amplifier coupled to the base of the control transistor to control the current through the reference resistor and a pre-selected control current to each trans-admittance amplifier to control the current flowing through the respective reference resistor to cause the respective output transistor to provide the respective reference electrical signal at a respective pre-selected voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
